

Profile

Software Engineer and Technical Lead with 17 years of experience building backend, platform and infrastructure systems. Strong Go, Linux, Cloud, automation and reliability background. Experience in leading teams, designing systems, architecting code, translating product needs into technical solutions and making pragmatic trade-offs.

Skills

- **Languages:** Go, Ruby, C/C++, Python, Shell, SQL
- **Technologies:** AI, Terraform, GCP, AWS, Docker, Linux, Git
- **Focus Areas:** Platform Engineering, Distributed Systems, Observability, Reliability, CI/CD, Infrastructure Automation, Developer Experience, Technical Leadership, Agentic Development

Experience

Cegeka 03/2024 – Present
Platform Engineer / Technical Lead

- Served as technical lead for a functional team, owning architecture guidance, code quality, delivery practices and system design direction.
- Standardized conventions, documentation and reusable patterns across teams to improve consistency and reduce delivery friction.
- Worked as a platform engineer and team enabler, improving delivery speed, quality, reliability and performance through automation and targeted platform support.
- Applied AI and agentic development practices to improve productivity without sacrificing quality.
- Applied SRE practices part-time helping teams improve reliability and operational readiness.

Clerk 05/2023 – 12/2023
Senior Go Engineer

- Built and expanded services, focusing on reliability, maintainability and API design.
- Maintained SDKs and wrote RFCs for new features with a strong focus on developer experience.

Causaly 03/2022 – 05/2023
DevOps Engineer

- Managed company-wide GCP infrastructure with Terraform and migrated production systems to infrastructure as code.
- Established Terraform guidelines and refactored existing infrastructure code for maintainability and security.
- Automated complex deployment processes and improved cloud cost management.

Skrutz 04/2015 – 02/2022
Platform Engineer / Technical Lead / Backend Engineer

- Led platform and tooling work across engineering teams, improving CI, developer environments and production delivery workflows.
- Built automation around CI/CD, containerization and internal platform operations.
- Containerized the core product and delivered production-quality data environments for faster, easier development.

Previous Experience 2006 – 2015

- **National Documentation Centre (2012 – 2015):** Full-stack Web Developer. Developed a new integrated library system with PHP, JavaScript and PostgreSQL.
- **MSLeague (2011):** Full-stack Web Developer for an online fantasy football product with PHP, JavaScript and MySQL.
- **The Creative Assembly (2008 – 2009):** Tools Programmer for the Total War franchise in C++.
- **Sentel (2006 – 2007):** Full-stack Web Developer with PHP, JavaScript and MySQL.

Education

MSc in Games Programming, University of Hull 2008
Ptychion (BSc) in Informatics, University of Piraeus 2007
