

Profile

Software Engineer with 17 years of experience in web development. Currently focusing on AI-native development practices. Extensive experience building scalable platforms, infrastructure automation and high-performance backend systems in Go. Strong record of bridging development and operations through automation, tooling, and pragmatic platform design.

Skills

- **Languages:** Golang, Ruby, C/C++, Python, Shell, SQL
- **Technologies:** AI, Terraform, GCP, AWS, Docker, Linux, Git
- **Focus Areas:** Platform Engineering, SRE, Developer Experience, CI/CD, Automation, Reliability, Observability, Developer mentoring, Team leading, Translating business to tech

Experience

Cegeka 03/2024 – Present
Platform Engineer / Technical Lead

- Accelerated delivery and reliability as a cross-team resource by applying SRE practices across multiple teams.
- Built a AI framework using agent skills to automate feature development and code reviews.
- Managed and scaled cloud infrastructure through infrastructure as code and targeted automation.

Clerk 05/2023 – 12/2023
Senior Go Engineer

- Built and expanded core backend APIs in Go and PostgreSQL on GCP.
- Maintained SDKs and wrote RFCs for new features with a strong focus on developer experience.
- Contributed across backend systems and user-facing technical documentation.

Causaly 03/2022 – 05/2023
DevOps Engineer

- Managed company-wide GCP infrastructure with Terraform and migrated production systems to infrastructure as code.
- Established Terraform guidelines and refactored existing infrastructure code for maintainability and security.
- Automated complex deployment processes and improved cloud cost management.

Skroutz 04/2015 – 02/2022
Platform Engineer / Technical Lead / Backend Engineer

- Developed DX tools and CI pipelines with GitHub Actions, Ruby, and Go to streamline engineering workflows.
- Led a tools-oriented team and mentored junior engineers in sound software engineering practices.
- Built internal tools and office automations, integrating core products with ERP systems.
- Containerized the core product and delivered production-quality data environments for developers.

Previous Experience 2006 – 2015

- **National Documentation Centre (2012 – 2015):** Full-stack Web Developer. Developed a new integrated library system with PHP, JavaScript, and PostgreSQL.
- **MSLeague (2011):** Full-stack Web Developer for an online fantasy football product with PHP, JavaScript, and MySQL.
- **The Creative Assembly (2008 – 2009):** Tools Programmer for the Total War franchise in C++.
- **Sentel (2006 – 2007):** Full-stack Web Developer with PHP, JavaScript, and MySQL.

Education

MSc in Games Programming, University of Hull 2008
Ptychion (BSc) in Informatics, University of Piraeus 2007
